| XZ-N925  | Woodway Electric /Non-<br>electric integrated treadmill |  | <p>1.The treadmill adopts high-end overall design combined with high-tech concepts to enable users to have more experience.The modes are divided into ① quick start ② manual mode ③ user mode ④ P program (there are six P modes) ⑤ no power mode ⑥ resistance model. Function display: race ring slope time pulse calorie distance speed. Provided for users with different needs Variety of choices. The treadmill adopts a crawler-type running belt, which is formed by advanced composite materials as a whole, and incorporates a soft shock-absorbing pad to meet the requirements of high service life under strong load. The large bearing capacity and high shock absorption can absorb the impact of pedaling while reducing the rebound force, which can more effectively reduce the trigger</p> | \$1,200.00 |
